

## EXECUTIVE SUMMARY

This deliverable represents one of the key deliverables for the Focus Phase of the Dakota County Criminal Justice Information Integration Network (CJIN) Implementation Plan.

This deliverable identifies the following data repositories utilized in Dakota County:

### **City of Eagan LOGIS CAD (Computer Aided Dispatch)**

- System where dispatcher receives information from phone call and enters incident information and dispatches appropriate response units for service.

### **City of Eagan LOGIS RMS (Records Management System)**

- Law enforcement records management system that stores incident and case information (usually transferred from CAD).

### **City of Burnsville CAD (Computer Aided Dispatch)**

- System where dispatcher receives information from phone call and enters incident information and dispatches appropriate response units for service.

### **City of Burnsville VISIONS RMS (Records Management System)**

- Records management system storing personal, arrest, custody, citation, incident, and warrant information.

### **Hastings Police Department Justice Information System**

- Police management system used to maintain incident, suspect, property, charge, and vehicle information.

### **Dakota County Sheriff's Department ENFORS System**

- ADU/AAI System
  - Contains information (address, arrest date, case number, contact agency, etc.) of person/business connected to criminal incidents.
- CAD (Computer Sided Dispatch)
  - System where dispatcher receives information from phone call and enters incident information and dispatches appropriate response units for service.
- OFF/CPE/CPR System
  - Contains offense, description of the crime against the person, and/or description of the crime against the property information.
- Property System
  - Contains stolen and/or recovered property information.
- Jail System
  - Contains personal information of prisoner such as occupation and appearance, cell assignment, booking, bail, and dispositional information.
- Warrant System
  - Contains information concerning the primary activity or offense causing the warrant.

**Dakota County Jail Imageware System**

- Contains personal information of suspect, charges, and mug shot images.

**Dakota County County Attorney Prosecuting System (CAPS)**

- County Attorney's case file management system used to maintain defendant, attorney, charge, bail, calendar, case, and disposition information.

**Dakota County Community Corrections Court Services Tracking System (CSTS)**

- Community Corrections case file management system used to maintain client activity, agent, case, disposition, offense, risk, and victim information.

**Dakota County Juvenile Detention Center Juvenile Information System (Fox Pro)**

- Juvenile Center's information system used to store juvenile's personal, guardian, offense, and dispositional information.

**Dakota County 1<sup>st</sup> Judicial District Total Court Information System (TCIS)**

- Automated court management system providing case management from case initiation to disposition and sentencing. TCIS also provides financial management functionality.

An electronic copy of each data repository's data elements is available upon request.

Data dictionaries outstanding include:

- Public Defender
- Fingerprint (DBI)
