

Miesville Ravine Park Reserve Concept Prioritization

Kurt Chatfield, Planning Manager Sarah Evenson HKGi

1

Overview

- Highlights from Community Feedback
- Revisions to Vision and Guiding Principles
- Confirm 5-year, 10-year, and Long-term Concepts
- Identify 5-year and 10-year implementation priorities
- Feedback on Interpretive Framework
- Questions/Comments

Community Feedback

- Keep park as natural as possible
- Explain some of the history of the area and provide selfguided interpretation
- Provide drinking water
- Offer loop trail opportunities and more trails throughout the park reserve, along with a connection to the CVT
- Make more amenities/experiences inclusive/accessible
- Improve water access and fishing opportunities
- Provide picnicking and camping along the Cannon River

3

County Board Direction

Focus on natural resources, minimal recreation development

10 Year Priorities

- Natural Resources: restore and manage additional 200 acres over 10 years (60%). Long term restoration of entire park
- Improve Cannon River access on County land
- Limited ADA accessible facilities: integrate into use areas; ½ mile trail
- Drinking water
- Trails: Up to 11 miles
- · New trailheads: North Trout Brook, Bluff Prairie

Long term: rustic camping, trail bridge over Cannon River, boat launch and picnicking on current inholding property

Δ

Vision and Guiding Principles

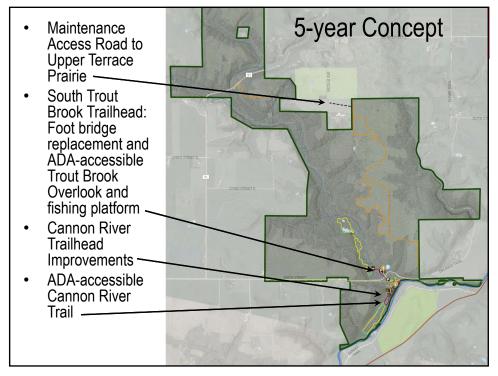

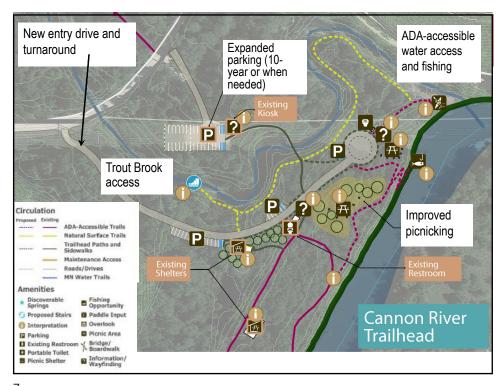

Protecting Habitats and Connecting People to the Wonders of the Natural World

- Compliment the rustic setting and provide a strong sense of arrival with entry improvements
- 2. Strike a harmonious balance between landscape preservation and human use
- 3. Celebrate the park reserve's rugged setting while making it more inclusive
- 4. Protect vulnerable and imperiled habitats

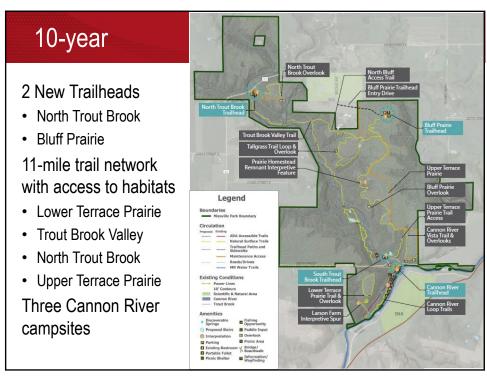

- 5. Embrace the Cannon River
- 6. Enhance connection to the Cannon River Valley
- 7. Highlight the upland terrace prairie
- 8. Recognize those who have stewarded this land for generations
- 9. Keep the park picturesque

Interpretive Sub-theme 2

Place: An Oasis for Nature

Protected and restored, the Park Reserve landscape comprises dramatic and varied topography that support many plant communities, from maple-basswood forest to dry bluff prairies, as well as cold trout streams, springs, and remnant upland bedrock bluff prairies. These natural features are an oasis replete with biodiversity.

17

Interpretive Sub-theme 3

Stewardship: Caring for the Future

Since the 1940s, people have sought to reverse some of the negative impacts of human actions and activities that have altered the landscape. Visitors today become part of the Reserve's conservation legacy when they participate in stewardship events and support conservation initiatives.
