## INTRODUCTION AND PROGRAM DESCRIPTION

### A. General Background

Dakota County is in the southeast corner of the Twin Cities Metropolitan Area (TCMA – Anoka, Carver, Dakota, Hennepin, Ramsey, Scott and Washington counties) and is comprised of 22 cities and 12 townships and nearly 600 square miles of land. Dakota County is the third most populous county in Minnesota with a population of 453,156.

In Minnesota, counties are responsible for developing programs and projects to achieve state goals and requirements for managing waste and implementing the Minnesota Pollution Control Agency's (MPCA) [Metropolitan Solid Waste Management Policy Plan](#) (Policy Plan) which sets the framework for managing solid waste in the TCMA. The MPCA adopted a revised Policy Plan (2022-2042) in 2024. Metropolitan counties are required to revise their individual county solid waste plans to implement the revised Policy Plan.

In 2014, Minnesota law established a recycling and organics recovery goal of 75% by 2030 for each TCMA county ([Minn. Stat. § 115A.551](#)). In addition, the Policy Plan includes waste diversion objectives for the TCMA as a whole:

Management Method	2025 Objective	2030 Objective	2036 Objective	2042 Objective
Recycling	36.9%	47.4%	47.4%	47.4%
Organics Recovery	21.5%	27.6%	27.6%	27.6%
Waste to Energy	24%	20%	20%	20%
Landfill	17.6%	5%	5%	5%

Table 2. Policy Plan (2022-2042)

The Policy Plan identifies Required, Optional, and State-led strategies. County revised plans must include all 32 Required Strategies and Optional Strategies that reach a minimum of 75 points. The MPCA is responsible for implementation of State-led strategies. The Policy Plan sets new county-specific plan focus areas for metropolitan counties, including expectations for residential curbside organics to be available throughout the metropolitan area in cities with a population greater than 5,000 by 2030.

Dakota County's [draft Solid Waste Management Plan](#) (Management Plan) includes strategies and tactics to identify how the county will manage waste within the County and the necessary state-directed strategies to implement the Policy Plan.

The following food scrap diversion strategies are included in Dakota County's draft Management Plan:

- **Strategy #28 (State-required strategy):** Make residential curbside organics collection available in cities greater than 5,000 by 2030. County tactics to implement this strategy include:
  - A. Update Dakota County Ordinance No. 110 to make curbside organics collection available for residential customers in suburban cities (e.g., require hauler implementation plan, prohibit container delivery charge).
  - B. Provide start-up resources to residents and municipalities to remove participation barriers (e.g., compostable bags, educational materials).
  - C. Provide support (e.g., funding, technical assistance, educational resources) to interested municipalities to research or implement best waste management collection practices (e.g., zoned contract areas, hauler franchise agreements).
- **Strategy 24 (State-required strategy):** Collect recyclables, organics and trash on the same day. County tactics include:
  - A. Update Dakota County Ordinance No. 110 to require haulers to collect recyclables, trash, and organics (if collected) on the same day for residential customers.
  - B. Provide resources (e.g., technical service, model language) for municipalities to update local codes.

Currently haulers are only offering commercial collection of organics and there are no waste haulers offering residential organics collection to single-family households within Dakota County. Residents who wish to compost their organics can self-haul their collected materials to one of [11 residential drop-off sites](#) located throughout the County or use backyard compost bins for select organics.

Most Dakota County households (90%) select their own hauler to pick up recycling and trash at home. The only exceptions are the cities of Farmington and Hastings, which contract for or license a single hauler to provide single-family household trash and recycling service.

Related, the MPCA has clarified that in order to comply with state statute ([Minn. Stat. § 115A.93](#)), licensing authorities are required to prohibit collectors or haulers from imposing a greater charge on residents who subscribe to organics collection than those who choose not to subscribe to organics collection. In other words, all residential customers must pay for organics service if the service is required by the licensing authority, just as all residential customers must pay for traditional recycling service, whether or not they use the service.

Dakota County Ordinance 110 (Solid Waste Management) requires haulers to provide standardized educational messaging to customers and to provide standardized labels on carts. Messaging is consistent with feedback heard from stakeholders during the solid waste plan revision process, which was to reduce confusion with the term organics and instead focus on food scraps.

## **B. Purpose of RFP**

The County's draft plan strategy for residential curbside organics (food scraps) collection is for a hauler provision to provide the service. However, some municipalities have expressed interest in learning best practice methods in the region for organics collection. The County requests proposals from qualified consulting firms to develop a Best Management Practices (BMPs) Toolkit for Municipalities that have expressed interest in learning best practice residential organics policy and collection system approaches of Twin Cities curbside collection programs.

The collection systems assessed must include food scraps that are collected in an:

- Open hauling system (e.g., licensed by the city)
- Municipality contracted hauling system (e.g., city contracts directly with one (or more) hauler to provide collection service in the city)

The County will share the information with municipalities for consideration making policy decisions for residential organics collection programs.

For purposes of this RFP:

- Residential means single family homes and multifamily homes with three (3) or less attached units (e.g., townhomes) and that have their own hauler-supplied trash and recycling cart.
- Organics refers only to food scraps and excludes compostable products, yard waste, pet waste, and any other non-food residential organics material.
- It should be assumed, that at least until the 2030 state mandated date, that Dakota County will only have access to facilities that require separate collection of food scraps (e.g., a third residential curbside cart dedicated to food scraps). Research for this project should focus on this type of collection system.
- Dakota County requires licensed haulers to provide weekly residential recycling collection (this also includes food scraps, if collected).

## SCOPE OF SERVICES

The following scope of service is provided to guide the evaluation. The County will consider other approaches, analyses, and/or tasks provided they achieve the project purposes and receive prior approval from County staff.

### The contractor will complete the following as part of the contract:

- 1) Facilitate a kickoff meeting with County staff to discuss project scope, approaches, analyses, tasks and timeline.
- 2) Coordinate at least bi-monthly meeting to provide project status updates.
- 3) Summary of the types of residential organics collection systems (e.g., municipality contracted, open hauling) in the TCMA, including:
  - i. Describe and compare advantages and disadvantages of each type of collection system for residential curbside organics collection.
  - ii. Describe Minnesota's statutory structures and city/town implementation processes for open versus municipality contracted collection systems.
- 4) Summarize the reasons, approach and lessons learned of:
  - i. Three (3) TCMA municipalities that recently changed from an open hauling systems to a municipality contracted hauling systems for residential organics collection and outcomes from the change.
  - ii. Up to three (3) TCMA municipalities that recently changed from a municipality contracted hauling system to an open hauling system for residential organics collection and outcomes from the change.
- 5) Identify typical timelines and major steps to establish each type of collection system (open and municipality contracted) for new curbside residential organics collection programs.
- 6) Identify and summarize city codes from all Dakota County suburban municipalities that may impact organics collection, including:
  - i. Cart placement/storage requirements.
  - ii. Number of residential waste containers allowed.
  - iii. Other relevant city code provisions.
- 7) Identify Twin Cities Metropolitan Area (TCMA) municipalities with open vs. municipality contracted systems for residential organics collection, including: one hauler contract (city contracts with a single hauler) and zoned collection with multiple haulers (city contracts with multiple haulers based on current market share or other means).
- 8) Provide two to three local best practices case studies from municipalities in the TCMA for each of the collection structures identified below:
  - i. Open residential organics collection system with open trash and open recycling;
  - ii. Municipality contracted residential organics collection system with open trash and open recycling;
  - iii. Municipality contracted residential organics collection system with municipality contracted trash and municipality contracted recycling;
  - iv. Structure(s) that include two (2) or more TCMA municipalities that have formulated a Joint Powers Agreement (JPA) for residential organics collection services (e.g., Hennepin Recycling Group).

For each collection structure, in #8 above, provide a summary of best practices, including:

- i. City staff versus waste industry roles for collection services.
  - ii. City policies (e.g., code requirements, service delivery approaches, hauler licensing provisions, or contractual language).
  - iii. Household service rates.
  - iv. Other results or antidotes (e.g., residential communication methods, residential participation rates).
- 9) Provide a summary of best practice implementation approaches from TCMA municipalities that have implemented residential curbside organics collection, including:
  - i. Collection cart options (e.g., size, type, color).
  - ii. Third cart storage options that includes a diagram showing the square footage footprint of two (2) 96-gallon containers (recycling and trash) versus the square footage footprint of three (3) carts sized at 96 gallon (recycling), 35 gallon (trash), and 35 gallon (organics) that are stored in a residential garage.
  - iii. Opt-in options (e.g., messaging to residents, etc.)
- 10) Other Considerations

  - iii. Describe typical compostable bag procurement process in both open and municipality contracted system.
- 11) Develop and discuss with County staff a draft report summarizing the analysis, conclusions and best practice recommendations for the various collection system comparisons.

The Contractor's duty to defend the County is not contingent upon a finding of liability or wrongdoing on the part of the Contractor. The indemnification, defense, and hold harmless obligations of this section do not apply to the extent that liability is the direct or proximate result of the negligence or fault of the County or any third party for whom the Contractor is not legally liable. This limitation is not a waiver on the part of the County of any immunity or limits on liability under Minn. Stat. Ch. 466, or other applicable State or Federal law.
- 7.3. Notice. The parties shall promptly provide Notice in writing and in reasonable detail of:
- A. Any demand, action, suit, or proceeding against the party providing Notice; or
  - B. Any event or fact that may give rise to indemnification under section 7.1 by Contractor.

Contractor shall promptly provide Notice to the County of any proposed settlement, and Contractor may not, without County's prior written consent (which the County will not unreasonably withhold, condition, or delay), settle such claim or consent to entry of any third-party judgment. Nothing in this section precludes Contractor from allowing County to undertake control of the defense.

Contractor shall maintain policies of insurance as set forth in **Exhibit Attachment**, and pay all retentions and deductibles under such policies of insurance. Any violation of this section is a material breach of this Contract. This section survives expiration or termination of this Contract. - 9.4. Payment of Subcontractors. This provision is required by Minn. Stat. § 471.425. Contractor shall pay the subcontractor within 10 calendar days after the date on which the Contractor receives payment from the County for undisputed Services performed by the subcontractor. Contractor agrees to pay interest of 1½ percent per month or any part of a month to the subcontractor on any undisputed amount not paid on time to the subcontractor. For unpaid balances of less than \$100, the Contractor shall pay the actual interest penalty due the subcontractor.
- 9.5. A violation of any part of this section is a material breach of contract.

## **10. FORCE MAJEURE**

Neither party shall be liable to the other party for any loss or damage resulting from a delay or failure to perform due to unforeseeable acts or events outside the defaulting party's reasonable control, providing the defaulting party gives notice to the other party as soon as possible.
