

# COMMUNITIES FOR A LIFETIME CITY PROFILE EAGAN, MINNESOTA

## ABOUT THIS REPORT

This City Profile was prepared by Dakota County's Communities for a Lifetime (CFL) Initiative—an initiative engaging community members and leaders in the private and public sectors to create accessible, supportive Communities for a Lifetime that enable people to lead active vital lives. Dakota County and individual cities work together in many areas to make communities more age-friendly. We work together on housing, public safety, transportation, workforce issues, and many other areas.

The population is aging. This is true across the nation, across the state, and in most communities in Minnesota. The shape and way of life in our communities needs to reflect this changing demographic landscape. Fortunately, people of any age desire similar things. They want to live in a community that is safe, affordable, and convenient, and that offers services and amenities that meet their needs, and opportunities that enrich their lives. But as people age, certain community characteristics are essential to a vital life. This profile reviews some of these features at the community level using reliable and accessible data from reputable sources.

## WHAT MAKES A COMMUNITY FOR A LIFETIME?

- **Transportation options** to help keep people mobile and independent
- **Walkable neighborhoods** for transport and exercise
- **A full range of affordable housing** options as needs change
- Accessible and quality **services that support older adults and caregivers** in home and community settings
- Flexible and supportive **employment and volunteer opportunities**, including intergenerational activities
- **Effective technology** to connect people and help with life's activities

## IS YOUR CITY BUILDING A COMMUNITY FOR A LIFETIME?

- Does your **Comprehensive Plan** present a plan and a vision for residents of all ages?
- Do your **land use, housing, and transportation policies** take the needs of an aging population into account?
- Are you **realizing the competitive advantage** of healthy, vital, and engaged older residents?

(All data presented in this one page overview is from 2013 unless otherwise noted.)

# POPULATION

## AGING OF THE POPULATION

The Baby Boom generation, born between 1946 and 1964, now age 50 to 68, represents a large percentage of the population. As they age, many Boomers will want to remain in the community where they currently live. Cities that recognize and respond positively to the aging population can gain a competitive advantage by meeting the needs and desires of their older population, and in doing so, will attract younger age groups that want an age-friendly community.

POPULATION BY AGE FOR EAGAN IN 2014

\* Age groupings corresponding to the Boomer generation are presented in black.  
 Source: 2011-2014 American Community Survey (Table S0101)

In 2014, **8.9%** of Eagan residents were 65 and older. However, this age group will grow substantially over the next 20 years, as members of the much larger boomer cohort age. The boomer age group (in 2014) represents about a quarter of the Eagan population (**25.5%**). According to AARP, since 1990, roughly 90% of older Americans have stayed in the county they've been living in, if not the very same home. **Is Eagan prepared for Boomers to age in place in the community?**

***In a 2014 National Council on Aging Survey, 54% of older adults (age 60+) said their community is doing enough to prepare for the needs of the growing aging population. [1]***

<sup>1</sup> *The United States of Aging Survey 2014*, National Council on Aging. Retrieved on September 21, 2015 from: <https://www.ncoa.org/wp-content/uploads/USA14-National-Fact-Sheet.pdf>

# OVERALL LIVABILITY

## THE AARP LIVABILITY INDEX

The AARP Livability Index is a web-based tool that allows users to measure the overall livability of US neighborhoods, cities, counties, or states based on 40 quantitative metrics and 20 public policies defined by the AARP's Public Policy Institute. The 40 measures of livability and 20 public policy are divided into seven major categories: housing, neighborhood, transportation, environment, health, engagement, and opportunity. The tool allows users to compare the results for their community with other communities, including national leaders in livability. 100 is the highest possible score in each category. Scores above 50 should be considered above-average, and scores below 50, below-average.

### AARP INDEX SCORES FOR EAGAN AND SELECT PEER CITIES, 0 TO 100

Category	Apple Valley	Burnsville	Eagan	Lakeville	Minnesota
<b>Total Score</b>	<b>59</b>	<b>59</b>	<b>59</b>	<b>58</b>	<b>60</b>
Housing	48	51	<b>47</b>	41	58
Neighborhood	59	60	<b>58</b>	55	52
Transportation	52	52	<b>50</b>	47	59
Environment	59	55	<b>60</b>	66	62
Health	65	65	<b>67</b>	65	60
Engagement	57	60	<b>58</b>	58	67
Opportunity	71	69	<b>69</b>	72	62

Source: AARP Livability Index, Retrieved on November 30, 2016 from: <https://livabilityindex.aarp.org>

The Total Score for Eagan, which is the numerical average of the seven sub-categories, is nearly identical to three select peer cities in Dakota County and the state of Minnesota as a whole. By the measures and policies that make up this Index, Eagan, its peers, and the whole state are above-average in terms of livability. Like its peers, Eagan scored highest in the Opportunity sub-category with a 69; this category includes measures on equal opportunity, employment opportunity, high school graduation, and population age diversity. Again like its peers, Eagan's lowest score was in Housing with a 47, a below-average rating; this category includes measures on housing options, affordability, and the physical accessibility of homes. **Are there other cities within Dakota County and around the country, with similarities to Eagan, scoring higher on the AARP Index that could push Eagan forward in planning for an older population?**

# HOUSING

## OVERALL HOUSING PERFORMANCE

### INDICATOR: HIGH OR INCREASING ANNUAL HOUSING PERFORMANCE SCORE

The Metropolitan Council rates Twin Cities' area communities to promote effective housing development and to make funding decisions for local housing projects. Each community's score is based on the following broad criteria: (a) Increased housing variety, (b) Housing cost, (c) Mixed land uses, (d) Increased transportation choices, and (e) Leverage of private investment. [2]

2006 – 2015 Average HOUSING PERFORMANCE SCORES OF SELECT DAKOTA COUNTY CITIES, 0 TO 100

For the specific scoring criteria, please see: [Guidelines for Priority Funding for Housing Performance](#)  
Source: Metropolitan Council Housing Performance Scores, 2006 - 2015.

From 2006-2015, Eagan's average Housing Performance Score was **67**, with a high score of 100 in 2015 and a low score of 52 in 2006 and 2007. The average score for the eleven major cities of Dakota County from 2006 to 2015 was 69, which marks Eagan's average score just below average. Its overall score suggests that Eagan is below its peers (Burnsville, Apple Valley, Lakeville) in one or more of the scoring criteria: housing variety, affordability, mixed-use development, transportation choices, and leverage of private investment. **What criteria can Eagan work on to improve its Housing Performance Score? Could Eagan improve its approach to housing as it makes plans to develop or redevelop land?**

<sup>2</sup> *Guidelines for Priority Funding for Housing Performance*, Metropolitan Council, July 2015. Retrieved on Sep. 30, 2015 from: <https://metrocouncil.org/Housing/Publications-And-Resources/HOUSING-POLICY-PLANS-REPORTS/Guidelines-for-Priority-Funding-for-Housing-Perfor.aspx>

# HOUSING AFFORDABILITY

## INDICATOR: SPENDING 30% OR LESS OF HOUSEHOLD INCOME ON HOUSING

This measure has long been a standard for defining housing as affordable. It is a good measure of affordability whether a household is above or below the Median Household Income in a community. In most communities, the cost of rental housing is of greater concern than owner-occupied homes—many more renters pay more for their housing as a percentage of their income.

### HOUSING COSTS AS PERCENT OF GROSS INCOME FOR HOMEOWNERS AND RENTERS 65+ IN 2014

Source: 2009-2014 American Community Survey (Table B25093 and B25072)

In 2014, 28% percent of Eagan home owners pay more than 30% of their gross income for housing. This is nearly identical to the situation of homeowners in Dakota County as a whole. However, more than two thirds (68%) of Eagan renters pay more than 30% on their housing. Renters in Eagan face slightly higher housing costs than renters across the whole county. The results for Eagan suggest that housing is less expensive for home owners than for renters, whom pay about the same as Dakota County renters as a whole. Many renters across the County are paying a larger proportion of their income for housing. **How could Eagan, Dakota County, and other public and private partners invest more in subsidized rental housing to help bring down housing costs for lower-income renters, including older adults?**

***20% of Minnesota Baby Boomers were considering a move in 2010 due to the cost of housing. [3]***  
***49% of older adults (age 60+) are concerned they will have too little money to last the rest of their lives. [4]***

<sup>3</sup> *Transform 2010 Data Report: Baby Boomer Survey*, Minnesota Department of Human Services, 2010. Retrieved on September 30, 2015 from: [http://www.dhs.state.mn.us/main/groups/aging/documents/pub/dhs16\\_156199.pdf](http://www.dhs.state.mn.us/main/groups/aging/documents/pub/dhs16_156199.pdf)

<sup>4</sup> *The United States of Aging Survey 2014*, National Council on Aging. Retrieved on September 30, 2015 from: <https://www.ncoa.org/wp-content/uploads/USA14-National-Fact-Sheet.pdf>

# HOUSING CHOICE

## INDICATOR: INCREASED VARIETY OF HOUSING BEYOND SINGLE-FAMILY HOMES

A person’s housing needs and preferences evolve throughout their life. Housing variety, including the cost and features of homes, allow people to grow-up and age in the same community. Communities that lack housing variety that is desirable to older residents may lose those residents to other communities within the county or elsewhere.

### PERCENTAGE OF **Non-Single Family Home** HOUSING BY TYPE IN EAGAN, 1990-2015

Source: U.S. Census 1990, 2000, 2010, and 2015; Metropolitan Council Housing Stock Estimates, 2015.

Among major non-single family home housing types, between 1990 to 2015, Eagan saw an increase in Townhomes from 16% to 20%. However, at the same time, there was a decline in the proportion of Multifamily Rentals or Condos from 30% to 25%. The proportion of Duplex, Triplex and Quad properties and manufactured homes remained roughly the same. Single-Family Detached homes increased slightly between 1990 and 2015, from 52% to 53%. The variety of housing types in Eagan is positive. **Could Eagan further increase its housing variety in the coming years to appeal to older residents who may want to down-size, or younger residents who need or prefer a non-single family home?**

***28% of Minnesota Boomers planning to move by 2020 reported they are considering a townhome or condominium. [5]***  
***40% of older adults (age 60+) anticipate home maintenance will be a concern as they age. [6]***

<sup>5</sup> Transform 2010 Data Report: Baby Boomer Survey

<sup>6</sup> The United States of Aging Survey 2014, National Council on Aging. Retrieved on September 21, 2015 from: <https://www.ncoa.org/wp-content/uploads/USA14-National-Fact-Sheet.pdf>

# HOUSING CHOICES IN LATER LIFE

## INDICATOR: VARIETY AND QUANTITY OF “SENIOR HOUSING” OPTIONS

Most people prefer to stay in a single family home, condominium, townhome, or all-ages apartment as they age. However, whether due to preference or a need for support that cannot be met well in their conventionally designed home, some make a move to “senior housing” – housing planned for older adults. Senior housing is generally restricted to people age 55 or older; but persons age 75 to 84, and 85 and older are more likely to live in “senior housing.”

UNITS OF SUBSIDIZED SENIOR RENTALS AND MARKET RATE CONGREGATE HOUSING IN 2013, PER 100 PERSONS AGE 75-84

Source: *Comprehensive Housing Needs Assessment for Dakota County, MN*, Maxfield Research, September 2013  
2011-2013 American Community Survey (Table S0101)

Housing Type / Age	Apple Valley	Burnsville	<b>Eagan</b>	Lakeville
Rental (Shallow-Subsidy)*	170	200	<b>245</b>	202
Rental (Deep-Subsidy)*	72	42	<b>0</b>	24
Independent Living (Few Services)+	176	433	<b>121</b>	0
Congregate (Moderate Services)^	136	200	<b>112</b>	77
People Age 75-84	1,390	2,290	<b>1,436</b>	899

\* Subsidized Rentals refers to age-restricted independent living apartments where rents are adjusted to increase affordability for low-income seniors.

+ “Independent Living” refers to age-restricted independent single-family, townhomes, apartments, condominiums, and cooperatives with few, if any, supportive services.

^ “Congregate” refers to multi-unit housing, such as townhomes, apartments, condominiums, and cooperatives with increasing, moderate supportive services. “Congregate” does not include Assisted Living or Memory Care Facilities (see below).

The graph and table above present data on varieties of “senior housing” with few or very limited built-in services. Two of the housing options offer subsidies to support affordability. In 2013, Eagan had 17 subsidized senior rental units for every 100 people age 75 to 84, an average ratio among its peers. **With the cost of rental housing being such a concern, could Eagan work to increase the ratio of subsidized units for older residents? Also, are there age-friendly features inside the housing units? Could new policies or educational campaigns encourage builders to construct universally designed buildings to meet the needs of aging adults—and by doing so better meet the needs of all age groups?**

**77% of older adults (age 60+) plan to stay in their current home for the rest of their life. [7]**

UNITS OF ASSISTED LIVING AND MEMORY CARE IN 2013 PER 100 PEOPLE AGE 85+

Source: *Comprehensive Housing Needs Assessment for Dakota County, MN*, Maxfield Research, September 2013  
2011-2013 American Community Survey (Table S0101)

Housing Type / Age	Apple Valley	Burnsville	Eagan	Lakeville
Assisted Living Units*	165	279	117	44
Memory Care Units^	14	84	94	72
People Age 85+	439	914	561	632

\* “Assisted Living” refers to multi-unit housing with more intensive supportive services than the “Congregate” category referred to above.  
^ “Memory Care” is multi-unit housing that, as the name suggests, provides intensive services for persons with declining memory.

<sup>7</sup> *The United States of Aging Survey 2014*, National Council on Aging. Retrieved on September 21, 2015 from: <https://www.ncoa.org/wp-content/uploads/USA14-National-Fact-Sheet.pdf>

This second graph looks at two Senior Housing options that offer more built-in services for residents, such as meals, housekeeping, and transportation, and increasing levels of personal care. Adult Foster Care programs, licensed residential homes for 4 to 5 residents age 55+, and Skilled Nursing Facilities (i.e. nursing homes), are not included here. These types of housing options were not included in the report by Maxfield Research, the source of this data.

Eagan has a more moderate number of assisted living units compared to its peers and the current size of its 85+ population: 21 units for every 100 residents age 85 or older. Eagan has the same ratio of memory care units: 21 units. Eagan, like other cities, should continue to evaluate if it has the appropriate number of “senior housing” units and affordable housing options for older adults based on its current population and projections for the future.

Across the state, the number nursing home beds is being reduced and we are seeing more funding for Home and Community-Based Services, and this trend is expected to continue. Many communities have responded to an aging population by building more Assisted Living units. In fact, Minnesota has more Assisted Living units than any other state in the nation. **How can Eagan continue to plan for and invest in housing with services to support older residents who may want to remain in this community as they age? What if Boomers avoid moving into Assisted Living facilities all together or wait until the very end of their life? Have some communities over-built the number of Assisted Living units they may need?**

***68% of Minnesota Boomers who plan to move by 2020 will be looking for homes where they could live on one level. [8]***

---

<sup>8</sup> Transform 2010 Data Report: Baby Boomer Survey

## ACCESSIBILITY AND VISITABILITY

### INDICATOR: AVAILABILITY OF HOUSING WHERE RESIDENTS CAN LIVE ON ONE LEVEL

The most basic home characteristic that supports accessibility and visitability is housing that allows a person to live on one level, with few or no stair systems. Stairs pose a barrier for many people if their physical functions are limited. In many cities, the best option for one level living is recently constructed multi-unit apartments or condominiums. These buildings frequently have zero-grade, accessible entries, elevators, and wide hallways and doorways leading to one-level units. While much less common, some single family homes, detached condominiums, townhomes, and multiplexes also provide residents with options for living on one level.

PERCENT OF HOUSING WITH A ONE-LEVEL-LIVING OPTION IN EAGAN AND SELECT CITIES, 2014<sup>9</sup>

Source: Dakota County Assessor's Office, 2014

Nearly one third of Eagan housing would allow a resident to live on one level of a home. Eagan is average compared to its peer cities on this measure, with Lakeville having a smaller proportion of one-level-living options, and Burnsville having a larger proportion. However, even homes that offer a good one-level-living option may need to be modified in one or more ways to make them truly accessible and visitable. Common home modifications include adding ramps to main entries, widening doorways, improving the living-level bathroom and shower, and moving laundry machines to the living-level. The vast majority of residents prefer to age-in-place. **How could cities, the county, and organizations support more practical home modifications and repairs to help residents age in place? Could an Aging in Place partnership/fund be set up to help homeowners stay in their homes—at less cost than other housing alternatives? As new housing of all types is constructed, how could cities encourage builders to include more accessible and visitable features in their design plans?**

<sup>9</sup> The Dakota County Assessor's Office organizes residential housing into as many as 24 categories; the categories encompass all major housing types: single family homes; townhomes; duplex, triplex and quads; condominiums; and multifamily buildings. The percent of "one story" living units is based on the number of one story units across all housing types. Two story homes may allow for single-level living, but this cannot be assumed.

# MOBILITY

## TRANSPORTATION COSTS

### INDICATOR: ANNUAL HOUSEHOLD TRANSPORTATION COSTS

Housing is generally the largest expense in a household budget, but transportation costs typically rank second, and so are very significant, especially for households with a low or fixed income. Some residents seek out affordable housing, which can often be found in suburban and exurban communities with lower land prices, but then inadvertently end up with higher transportation costs, especially if their housing is a long distance from their work or the many basic services we all need. The US Department of Housing and Urban Development is now promoting a combined measure of housing and transportation affordability it calls “Location Affordability,” which considers the cost of housing and transportation together.<sup>10</sup>

### 2008-2012 ANNUAL TRANSPORTATION COSTS IN EAGAN, SELECT CITIES, MINNESOTA AND THE US

Source: U.S. Department of Housing and Urban Development, Location Affordability Index, 2008-2012, <http://www.locationaffordability.info/lai.aspx>

The estimated annual household transportation costs for Eagan’s residents at \$13,350. is at the Dakota County median and less than the costs experienced by Minnesotans as a whole. This is the same estimated cost as Eagan’s peer cities of Apple Valley and Burnsville, except for Lakeville which pays considerably more. **How can Eagan, and other Dakota County cities, attract more employers to reduce daily commutes for its residents? How can cities adjust land use policies to shorten distances and improve access to shopping, services, and other amenities? Further, might the city explore more public and alternative transportation services to decrease residents’ reliance on cars for transportation?**

<sup>10</sup> U.S. Department of Housing and Urban Development, Location Affordability Index, Retrieved on October 31, 2016 from: <http://www.locationaffordability.info/>

# WALKABILITY

INDICATOR: WALK SCORE, 0 TO 100

Walking, or rolling using an assistive device, is the most basic and affordable mode of transportation. However, since many streetscapes are designed primarily for cars, walkers may find the distances to their destination too great and the routes unsafe. Walk Scores measure the walkability of an area using digital maps and data about distances to common amenities and pedestrian friendliness.

City-Wide Walk Score	Cedar Grove Walk Score	90–100	Walker's Paradise: <i>Daily errands do not require a car</i>
21	43	70–89	Very Walkable: <i>Most errands can be accomplished on foot</i>
		50–69	Somewhat Walkable: <i>Some errands can be done on foot</i>
		25–49	Car-Dependent: <i>Most errands require a car</i>
		0–24	Car-Dependent: <i>Almost all errands require a car</i>

Source: <https://www.walkscore.com/MN/Eagan>, Retrieved on October 31, 2016

Overall, Eagan is a very Car-Dependent city, with a walk score of 21. In most locations across the city, most errands require a car. However, throughout the city there are locations that are more walkable. A Mixed-Use or Suburban-Intensity area of the city near the intersection of Cedar Avenue and Highway 13 (address: Eagan Outlets Pkwy. & Cedarvale Dr.) – the Cedar Grove Redevelopment Area – achieved a Walk Score of 43. (Research shows that when people walk or bike to do their shopping they take more trips and spend more money.)

While not all residents value walkability, a growing number do. Strategically investing in Suburban-Intensity developments or otherwise improving the proximity of residences and essential amenities will serve older residents and others who value walkability. **How can Eagan strategically invest in greater walkability, more sidewalks, and more mixed-use or Suburban-Intense developments? What policies need to be updated or changed to increase walkability?**

# WALKABILITY

## INDICATOR: PRESENCE OF SIDEWALKS

Sidewalks are the building blocks of an effective pedestrian network. When sidewalks are not available, pedestrians are forced to share the street with motorists, access to public transportation is restricted, and children have fewer play areas that are safe. Streets without safe places to walk, cross, catch a bus, or bicycle put people at risk. Over 5,600 pedestrians and bicyclists died on U.S. roads and there were 115,000 reported injuries in 2014.<sup>11</sup> Pedestrian crashes are more than twice as likely to occur in places without sidewalks; streets with sidewalks on both sides have the fewest crashes.<sup>12</sup> Walkability is enhanced even further by three core characteristics: the continuity and connectivity of pedestrian ways (i.e. sidewalks, trails, bike lanes, street crossings, crosswalks); the safety of the pedestrian ways; and the proximity of essential services to residences. The data of this measure speak to the first core characteristic.

PERCENT OF STREETS WITH SIDEWALKS OR TRAILS IN 2015

Note: "Streets" are defined here as local roads, county roads, and county-state aid highways.  
Source: Dakota County Physical Development Division, 2015

Eagan is below average in its sidewalk coverage and connectivity compared to the eleven major cities of Dakota County. That being said, its sidewalk system is roughly comparable to two of its peer cities, Burnsville and Lakeville. Apple Valley stands out among its peers on this measure, well exceeding the average percentage of sidewalk coverage for the eleven major cities in Dakota County. **As Eagan develops and redevelops land, how might the city improve its pedestrian infrastructure?**

<sup>11</sup> Source: [http://www.pedbikeinfo.org/data/factsheet\\_crash.cfm](http://www.pedbikeinfo.org/data/factsheet_crash.cfm)

<sup>12</sup> Source: [http://safety.fhwa.dot.gov/ped\\_bike/tools\\_solve/walkways\\_brochure](http://safety.fhwa.dot.gov/ped_bike/tools_solve/walkways_brochure)

## PUBLIC TRANSIT AND ALTERNATIVE TRANSPORTATION

### INDICATOR: PRESENCE OF PUBLIC AND ALTERNATIVE TRANSPORTATION

Many people who are able to drive express interest in transportation alternatives such as buses, trains, walking, or biking. But for older adults who do not drive, transportation alternatives become critically important. Without transportation, residents find it difficult to access basic services, remain independent, and stay involved in the life of the community. Alternative transportation options available to residents of Apple Valley are described in the table below. (Some information in this table may have evolved as routes are modified and providers change.)

Category	Provider(s)	Scope of Service	Description
Bus Rapid Transit	Metro Transit	1 stop in Eagan; higher frequency service, seven days a week.	Metro Red Line. Provides transit to the Mall of America, a major transit hub with connections to light rail.
Fixed-route	Minnesota Valley Transit Authority	Moderate local coverage; Good express and commuter coverage	Is a fixed transportation route with scheduled designated stops. Riders are responsible for getting to the designated stops. Cedar Grove Station Eagan Transit Station Local Routes: 437, 438, 440, 444, 445, 446 Express/Commuter Routes: 415, 436, 470, 472, 475, 480, 484, 489
Curb-to-Curb	A-Tran -- South Metro, Mpls/St Paul GAPP Services -- Dakota County MNET -- Metro Area Transit Link -- Metro Area		Requires the rider be able to meet the vehicle at the curb. Drivers do not help individuals into homes, apartment buildings or businesses. Drivers pick-up and drop-off passengers at the curb only.
Door-to-Door	A-Tran -- South Metro, Mpls/St Paul Metro Mobility -- Metro Area MNET -- Metro Area Transit Link -- Metro Area		Driver provides some assistance to rider to ensure they make it safely from their main door onto the vehicle. The driver provides the same service on the return trip.
Door-through-Door	A-Tran -- South Metro, Mpls/St Paul MNET -- Metro Area		Driver enters the home/building to provide assistance to the rider to ensure they make it safely through their front door and onto the vehicle. The driver provides the same service on the return trip.
Volunteer Driver Program	GAPP Services	All of Dakota County	Individuals who volunteer their time and vehicle to provide transportation services to a community. Most often vehicle is a sedan and space is limited to riders with only canes and folding walkers.

Source: Metro Transit: <https://www.metrotransit.org>; "Transportation Options Resource Guide: Dakota County retrieved on July 3, 2015 from: <http://www.darts1.org/transportation-options-resource-guide>

## DRIVER SAFETY

### INDICATOR: DECREASED TRAFFIC CRASHES AND TRAFFIC RELATED INJURIES.

Driving a car is the most common mode of transportation for most people. This is especially true in suburban and rural communities where mass transit options are often limited. Sidewalks and trails are also frequently underdeveloped. For these reasons, driving conditions become increasingly important. Some cities are making design improvements, including: better, larger signage for older drivers; more designated left-hand turn lanes; rumble strips on lane markers or shoulders; and improved safety at crosswalks.

#### NUMBER OF TRAFFIC CRASHES AND INJURIES IN EAGAN FOR DRIVERS 65+, 2010-2014

Source: Minnesota Department of Public Safety Crash Facts, 2010-2014; American Community Survey, 2010-2014

In Eagan, the number of traffic crashes involving drivers 65+ decreased steadily between 2010 and 2014 – 21 percent overall – while the number of injuries remained roughly flat, declining finally in 2014. Regrettably, three fatalities were recorded for drivers 65+ over this same period, one each year, in 2011, 2012, and 2013. Across the US, more than 4,500 pedestrians are killed by motor vehicles every year. However, this does not have to be the case—more can be done to save lives. These deaths are preventable. Speed does kill. Two studies, one in the US and a second in the UK, revealed that pedestrians are killed 5% of the time when struck by a car going 20 mph; 37-45% of the time when struck by a car going 30 mph; 83-85% of the time when struck by a car going 40 mph. Traffic on most American streets travel closer to 40 mph instead of 20 mph. If we reduce car speeds to 20 mph through traffic-calming road redesign, education, and enforcement strategies, we could reduce pedestrian fatalities by 90%. **How can the state, county, and cities work together to prioritize dangerous streets for redesign and speed reduction to save more lives?**

# LAND USE

## MIXED-USE LAND

### INDICATOR: PROPORTION OF LAND DEVELOPED AS MIXED-USE

Mixed-use developments (also known as Suburban-Intensity) have received increasing attention among city planners and administrators, and the general public. Well-executed mixed-use developments can address many livable community characteristics at once, including: housing-type variety, convenience to shopping and services, walkability, and public safety.

### PERCENT OF RESIDENTIAL LAND USE COMPARED TO MIXED-USE FOR SELECT CITIES, 2010\*

SOURCE: METROPOLITAN COUNCIL GENERALIZED LAND USE DATA, 2010 (\*NEW 2016 LAND USE DATA NOT AVAILABLE UNTIL SPRING 2017)  
NOTE: FOR MORE SOURCE INFORMATION SEE: [HTTP://METROCOUNCIL.ORG/METC/FILES/6D/6DB8637A-FE3F-4F06-954B-581B680DE527.HTML](http://METROCOUNCIL.ORG/METC/FILES/6D/6DB8637A-FE3F-4F06-954B-581B680DE527.HTML)

Eagan has the highest percentage of mixed-use land at 1.4% of the city's total land area; however, all four cities have a very low percentage of mixed-use development. Suburban-intensity is not something that needs to be feared as increased "density," something often fought by residents of suburban communities. Suburban-intensity can be targeted to specific areas of the city where walkability and density can be achieved more easily. The Cedar Grove Redevelopment Area (near Cedar Avenue and Highway 13) is the prime example within Eagan. Some cities are creating age-friendly areas or districts that are benefiting from this approach. Currently, Minneapolis and St. Paul are seeing record levels of construction of mixed-use developments of rental apartments with commercial space at the street level. Millennials and Boomers are competing to live in or near these walkable neighborhoods. **Can suburban communities replicate and benefit from this trend that is likely to continue into the future, or will some suburban communities be left out?**

# PARK SPACE

## INDICATOR: PROXIMITY TO PARK SPACE

Public parks and trails are a great common space for people of nearly any circumstance to get out and interact in the community and stay healthy. To better support older residents and people with limiting health conditions, park spaces should increasingly offer shade, shelter, a place to sit and rest, and accessible bathrooms, all of which benefit the entire community.

### NUMBER OF PARKS WITHIN A HALF-MILE IN 2013

Apple Valley	Burnsville	Eagan	Lakeville	Median US Neighborhood
3.4	3.6	2.5	2.2	0.0

Source: AARP Livability Index, retrieved on October 31, 2016 from: <https://livabilityindex.aarp.org>

According to the AARP Livability Index, Eagan has 2.5 parks in each half-mile radius of land area. Apple Valley and Burnsville have a higher concentration of parks, whereas Eagan and Lakeville have a lower concentration of parks, and nearly the same ratio of parks to land area. Some of the Eagan parks and recreational amenities are described in the table below. **How can Eagan and other cities continue to make parks both good places for children and older adults—more benches and more equipment for all age groups? And how can cities continue to improve non-motorized access to parks through sidewalk and trail enhancements, so that people of all ages can walk, bike, or roll (i.e. using an assistive device) to their nearest park?**

Select Amenities	Number and Land Area	Description
Public Parks	56 parks on 1,400 acres	32 tennis courts; 15 hockey rinks; 15 pleasure rinks; 41 ball fields; 27 soccer fields; 43 play structures for a variety of ages 5 pavilions, 8 warming house/multi-functional buildings and one retreat center available for reservations
Lebanon Hills Regional Park	1 park on 1,795 acres	Offers a very wide array of recreational activities, including: hiking, boating, horse riding, fishing, and winter activities including cross-country skiing. 320 acres are in Apple Valley.
Special Park & Recreation Features	1 outdoor skate park located at Lexington-Diffley Park 3 pickleballs courts at Skyhill and Ridgeview Parks 2 outdoor BMX-style bike parks open seasonally 1 Disc Golf Course located at Northview Park 1 Off-Leash Dog Area located at Thresher Fields Park	

Source: <http://www.cityofeagan.com/index.php/parks>

## FOOD ACCESS

### INDICATOR: ACCESS TO HEALTHY AND AFFORDABLE FOOD

It is difficult to make healthy food choices when grocery stores and farmers' markets are not near where you live. People who do not drive or lack transit options and those that are low-income are forced in many instances to rely on food options that are less healthy from nearby convenience stores, and it may cost them more money.

#### NUMBER OF GROCERY STORES AND FARMERS' MARKETS WITHIN A HALF-MILE IN 2013

Apple Valley	Burnsville	Eagan	Lakeville	Median US Neighborhood
0.5	1.0	0.3	0.1	0.0

Source: AARP Livability Index, retrieved on October 31, 2016 from: <https://livabilityindex.aarp.org>

The AARP Livability Index rates a community's food access by measuring how many grocery stores or farmer's markets exist in each half-mile radius within the city, a reasonable walking distance for most people. According to this source, Eagan has 0.3 stores or markets per half-mile radius, or by extrapolation, roughly one store or market per 1.5 mile radius. On this measure, Burnsville has much greater food access with one store or market a half mile from any given location. (Note: Most US neighborhoods, including vast rural areas, score a zero for grocery stores or farmer's markets within a half-mile. However, by contrast, the score for the city of Minneapolis is 5.3).

Sometimes residents face financial or transportation barriers in gaining access to food. **What can communities do to promote their farmers' markets to all residents, and ensure that those in need have access to grocery stores and home delivered meals or food?**

Service agencies can help close the food access gap. Dakota County has an excellent listing of Food Shelves & Community Meals on its website.<sup>13</sup> Ensuring that all are fed, of whatever age and circumstance, is a basic need that all communities need to address together.

---

<sup>13</sup> Dakota County, Minnesota, Food Shelves & Community Meals:

# COMMUNITY LIFE

## EMPLOYMENT

### INDICATOR: PERCENT OF PEOPLE AGE 65 TO 74 IN THE LABOR FORCE

Complete retirement from paid work at 65 is slowly being revised in our culture, through public policy, but also through the needs, plans, and preferences of aging workers and employers. A healthy labor force participation rate should closely reflect the percent of people in any age group who express a desire to work.

#### LABOR FORCE PARTICIPATION AGE 65 TO 74 IN EAGAN, WITH SELECT COMPARISONS IN 2014

Source: 2009-2014 American Community Survey (Table S2301)

Eagan's rate of labor force participation among workers age 65 to 74 is slightly higher than the labor force participation rate of Dakota County and Minnesota as a whole, at 29.1%. Apple Valley reports the highest rate among the comparisons shown above at 37.3%. While not all older adults desire to work for pay beyond traditional retirement age, a significant portion do and will. And others will need to because of their personal financial circumstances. Older adults should be able to work with various accommodations and incentives to participate in the shrinking workforce. **How are local businesses helping older workers to remain in the workforce?**

***23% of Minnesota Boomers have no plans to stop paid work at any age. [14]***

***32% of older adults (age 60+) are concerned they will not be able to work as long as they would like. [15]***

<sup>14</sup> Transform 2010 Data Report: Baby Boomer Survey

<sup>15</sup> The United States of Aging Survey 2014, National Council on Aging. Retrieved on September 21, 2015 from: <https://www.ncoa.org/wp-content/uploads/USA14-National-Fact-Sheet.pdf>

# VOLUNTEER CAPACITY

## INDICATOR: INCREASED VOLUNTEER HOURS FOR PEOPLE 65+

A growing number of people will remain in the workforce past the age of 65, but whether working or retired from paid work, older residents will volunteer in great numbers. Volunteering is not only a vital form of enrichment for older adults, but it is also a valuable community asset that should be utilized fully.

ESTIMATED VOLUNTEER HOURS FOR POPULATION 65-74 AND 75+ IN EAGAN IN 2014

Older adults in Eagan provided an estimated 139,332 hours of volunteer service in 2014, the most recent data available. This is the equivalent of 66.9 full time equivalent employees, and at a rate of \$24.00 per hour, this amounts to a wage-labor value of \$3,343,968. Older adults and aging Boomers are assets to the community; they spend more money locally, and they value their communities and most want to give back. Communities that provide meaningful opportunities for older adults to volunteer will capitalize on this vital source of talent and energy. Four Dakota County cities (Apple Valley, Inver Grove Heights, West St. Paul, and Rosemount) have partnered to fund a volunteer coordinator position to try to take advantage of residents’ desire to volunteer. **How can Eagan further capitalize on older adult volunteers as an asset to the community? Could a local entity better coordinate and advertise the opportunities that do exist?**

## LIVING ALONE

### INDICATOR: PERCENT OF PEOPLE 65+ LIVING ALONE

Some people live alone and are content with their circumstances. However, people who live alone tend to have less income, and as they age, find it more difficult to remain mobile, access services, and stay involved in the life of the community. Communities need to be aware of this segment of the population and better shape the community environment to support these residents.

#### AGE 65 AND OVER LIVING ALONE, 2000 AND 2014

Source: 2009-2014 American Community Survey (Table B09020); US Census 2000 (Table P030)

The proportion of older adults living alone in Eagan increased between 2000 and 2014, from 23% to 28%. The same percentage of older residents live alone in Eagan as live alone in Dakota County as a whole. Like in most communities, many more female residents live alone in Eagan as compared to men. When living alone turns to isolation, individuals can experience physical and mental decline. **In circumstances like this, what could be done to better identify and assist isolated older adults? Could nonprofits or faith communities partner to provide home visits or check-ins by phone? Could more formal neighborhood networks be helpful to those living alone and create stronger neighborhood connections and support for everyone?**

***48% of socially-isolated older adults list transportation as the thing they will most likely need help with in the future. [16]***

<sup>16</sup> *The United States of Aging Survey 2014*, National Council on Aging. Retrieved on September 21, 2015 from: <https://www.ncoa.org/wp-content/uploads/USA14-National-Fact-Sheet.pdf>

## PUBLIC SAFETY

### INDICATOR: DECREASED CRIME

All residents want to feel safe in their community. Feeling unsafe negatively affects residents' participation in the community. For older residents, too, feeling unsafe inhibits their trips out of the home for services, work, volunteering, or recreation, leading to harmful isolation.

#### CRIME RATES IN EAGAN, 2010-2015

\* The crime rate represents the number of reported crimes per 100,000 in population.

\*\* Part 1 Crimes include: murder, rape, robbery, aggravated assault, burglary, larceny, vehicle theft and arson;

Part 2 Crimes include: other assaults, forgery, fraud, vandalism, sex offences, drugs and alcohol and DUI

Source: Minnesota Department of Public Safety State Crime Books, 2010-2015

Overall, crime rates in Eagan declined by 25.1 percent from 2010 to 2015. Both Part 1 and Part 2 crimes declined over six years, year upon year. This is a very favorable trend for public safety in Eagan, Minnesota. **How can all communities continue to work with residents to lower crime rates and increase engagement of all residents, including older adults that may face isolation?**

# AGE-FRIENDLY POLICIES

## ACCESSORY DWELLING UNIT POLICY

An accessory dwelling unit (ADU) – also known as a “granny flat,” “mother-in-law apartment” or “carriage house” – is a self-contained living unit that can be located within the walls of an existing or newly constructed home, or that can be an addition to an existing home. It can also be a freestanding structure on the same lot as the main house. ADUs have received significant attention in recent years as a way to provide more flexible housing options using existing housing stock. Over the past few decades, municipalities across the country have adopted standards to allow or encourage the construction of ADUs.

Accessory Dwelling Unit Policy: Yes/No?	Yes
<p><b>Some Policy Details</b> Eagan does have an Accessory Dwelling Unit Policy.</p> <ul style="list-style-type: none"> <li>• <b>Ordinance effective:</b> May 2014</li> <li>• <b>Zones:</b> R-1 or Estate Zoning.</li> <li>• <b>Regulation:</b> Conditional use permit; only if no adverse impact on adjacent properties.</li> <li>• <b>Occupancy:</b> Maximum of 2.</li> <li>• <b>Property owner occupancy:</b> must be owner's legal residence; owner may live in primary residence or ADU. ADU must not be subdivided or otherwise segregated in ownership from the primary residence.</li> <li>• <b>Development conditions:</b> <ul style="list-style-type: none"> <li>-ADU must be within or attached to the primary residence.</li> <li>-The ADU must be owned by the owner of the primary residence.</li> <li>-ADU must comply with all building codes and city ordinances.</li> <li>-ADU registrations are filed with the City Clerk, to be in effect for a 12 month period and renewed annually.</li> </ul> </li> <li>• <b>Building Area Ratio:</b> No ADU shall be permitted if the building coverage on the lot exceeds or will exceed 20%.</li> <li>• <b>ADU size:</b> ADU's total floor area shall be no less than 300 square feet and no more than 960 square feet, or 33% of the primary residence's footprint, whichever is less.</li> <li>• <b>Design - interior features:</b> Maximum of 2 bedrooms. Smoke detectors are required in all sleeping rooms and Carbon Monoxide detectors are required within 10 feet of sleeping rooms.</li> <li>• <b>Parking:</b> 2 off-street spaces for ADU, plus 2 for primary residence.</li> <li>• <b>Utilities:</b> Primary residence and ADU must be connected to city sewer and water.</li> <li>• <b>Number of ADUs currently permitted in Eagan:</b> 2 registered (as of 7-18-16)</li> </ul> <p><b>Opportunities:</b> Why are there so few registered ADUs? Is the public not aware of this option? Is the cost of adding an ADU to the attached structure prohibitive? Are the additional parking spaces a barrier?</p>	

**For more information on ADUs:**

AARP, Accessory Dwelling Units, Model State Act and Local Ordinance  
[http://assets.aarp.org/rgcenter/consume/d17158\\_dwell.pdf](http://assets.aarp.org/rgcenter/consume/d17158_dwell.pdf)

For sample, downloadable language, see Model Code for Accessory Dwelling Units  
<https://accessorydwellings.org/2014/11/25/model-code-for-accessory-dwelling-units>

**Dakota County cities with ADU policies for consideration:**

- Apple Valley, Code of Ordinances: <http://www.ci.apple-valley.mn.us/index.aspx?NID=357>
- Eagan, Municipal Code:  
<http://www.cityofeagan.com/index.php/planning-zoning/city-code-enforcement>
- Inver Grove Heights: Amendment: Title 10, Chapter 18: <http://www.ci.inver-grove-heights.mn.us>

Source: Eagan, MN Planning and Zoning Dept. website, [www.cityofeagan.com/index.php/planning-zoning/city-code-enforcement/accessory-dwelling-unit-registration](http://www.cityofeagan.com/index.php/planning-zoning/city-code-enforcement/accessory-dwelling-unit-registration)

ADUs ordinances are often driven by requests from homeowners. **Could Eagan's ADU policy be updated or improved to allow wider usage by increasing numbers of aging residents or those that have aging parents? For example: Could the ordinance be updated to allow ADUs on smaller lots, or to encourage accessibility and Universal Design in the construction of the units?**

## COMPLETE STREETS POLICY

“Complete streets” is an approach to road planning and design that considers and balances the needs of all transportation users. It is about improving the basics—the transportation system’s safety and functionality for all users—but in many cases, also making transit ways more aesthetically pleasing. Its main premise is for people to get around safely and efficiently from point A to point B, using whatever mode of travel they choose. The complete streets approach helps to maximize the use of public roadways and right-of-way in order to provide a comprehensive and connected multimodal transportation system.

A recent study comparing the United States with Germany and the Netherlands, where Complete Streets are common, found that when compared per mile/kilometer traveled, bicyclist and pedestrian death rates are two to six times higher in the United States. Complete Streets therefore improve safety for all users. According to an international study, as the number and portion of people bicycling and walking increases, deaths and injuries decline. This is known as the safety in numbers hypothesis: more people walking and biking reduces the risk per trip.

Complete Streets Policy: Yes/No?	Yes
<p><b>Some Policy Details:</b> Eagan does have a Complete Streets ‘resolution,’ stating the City of Eagan’s ongoing support and intent to utilize Complete Streets principles in transportation planning and community design.</p> <p>“The City of Eagan adopted a resolution on Feb. 9, 2010 to encourage the Minnesota Legislature, with input and guidance from the MN Department of Transportation, to authorize the development of a statewide Complete Streets Program...”</p> <p>“The City of Eagan has consistently followed Complete Streets principles in its planning and community design, and has demonstrated said commitment by adopting a transportation goal within the 2030 Eagan Comprehensive Guide Plan to develop a multi-modal transportation system in with autos, trucks, rail, transit, bicycles and pedestrians are adequately served and can safely co-exist...”</p> <p><b>Opportunities:</b> While it is commendable to have a Complete Streets resolution and pursue safer streets for all users, what percentage of streets in Eagan are multi-modal Complete Streets?</p> <p><b>An ideal Complete Streets policy:</b></p> <ul style="list-style-type: none"> <li>• Includes a vision for how and why the community wants to complete its streets</li> <li>• Specifies that ‘all users’ includes pedestrians, bicyclists and transit passengers of all ages and abilities, as well as trucks, buses and automobiles.</li> <li>• Applies to both new and retrofit projects, including design, planning, maintenance, and operations, for the entire right of way...</li> </ul> <p>For more details on an ideal policy, go to:  <a href="http://www.smartgrowthamerica.org/complete-streets/changing-policy/policy-elements">http://www.smartgrowthamerica.org/complete-streets/changing-policy/policy-elements</a></p>	

**For more information on Complete Streets Policy:**

[http://cityofeagan.com/images/CommunityDevelopment/Planning/CompPlan2030/7%20-%20Transportation\\_low.pdf](http://cityofeagan.com/images/CommunityDevelopment/Planning/CompPlan2030/7%20-%20Transportation_low.pdf), City of Eagan Transportation Plan: [http://www.cityofeagan.com/images/publicworks/Eng/RSCP\\_CompTransportation.pdf](http://www.cityofeagan.com/images/publicworks/Eng/RSCP_CompTransportation.pdf)

**How can cities realize not just the benefits of safe multi-use streets but also the economic benefits of bike and pedestrian-friendly Complete Streets? How might funding for Complete Streets projects be leveraged through increased inter-government coordination or public-private partnerships?**

## MIXED-USE (OR SUBURBAN-INTENSITY) LAND POLICY

Mixed land use is a critical component of an aging-friendly community, enhancing mobility and housing options, and offering several other community benefits all at once. Some are now referring to mixed use planning occurring in the suburban environment as Suburban-Intensity. The uses may be mixed vertically (in a common structure) or horizontally (in a common site or area).

By putting a mix of residential, commercial, and recreational uses in close proximity to one another, alternatives to driving, such as walking or biking, become more attractive. At the same time, a denser, more sizable population makes public transit more viable. Incorporating multi-unit housing options into Suburban-Intensity areas provides residents with housing options and often more accessible and visitable homes.

There are also public health, public safety, and economic benefits to Suburban-Intensity areas. Compact, walkable neighborhoods encourage more physical activity, with residents walking rather than driving to their destinations. And with more people and eyes on the street, people feel safer. Economic benefits include: rising property values, increasing local tax receipts, and increased foot-traffic for local businesses.

Mixed-Use Land Policy: Yes/No?	No
<p><b>Some Policy Details:</b> Eagan does not have a clearly defined mixed-use land policy.</p> <p>However, there is discussion of some mixed-use land concepts in regards to “active living” outlined in the city’s Land Use Plan.</p> <p>According to the Land Use Plan, Eagan is pursuing the following objectives:</p> <ul style="list-style-type: none"> <li>• Creating compact, mixed-use neighborhoods that place parks, schools, civic buildings and retail within walking distance of people’s homes.</li> <li>• Creating mixed-use developments with accessible transit.</li> <li>• Supporting dense, mixed-use development with a range of retail, office, services, medium/high-density residential, employment and public space uses.</li> </ul> <p><b>Possible Next Steps to Develop a Policy:</b> At the present time, the Land Use Plan designates 1.4% of the land area of Eagan as Mixed-Use, naming two Special Areas (Cedar Grove Commons and Carriage Hills Commons) guided as Mixed-Use to reflect specific plans for those areas. However, these are project-specific designations, and do not set guidelines or standards for future land use planning. Interest and demand for more walkable and bikeable communities is growing rapidly, and the city’s recent Eagan Forward process has demonstrated residents changing preferences for more livable, walkable, compact neighborhoods.</p> <p><b>For more information on Mixed-Use Land Policy:</b></p> <p>American Planning Association, Quick Notes, Zoning for Mixed Uses  <a href="https://www.planning.org/pas/quicknotes/pdf/QN6.pdf">https://www.planning.org/pas/quicknotes/pdf/QN6.pdf</a></p>

The challenge in any city is balancing what the community wants and needs with what the market is demanding at the time and what developers are willing to build. **How can Eagan increase the number of mixed use developments that combine residential, retail, and commercial uses to increase housing and shopping options, and walkability for the benefit of all residents? What specific policies could the city implement to ensure that mixed-use designations are continually incorporated into future land use planning?**

## BIKE WALK POLICY

Bike walk policies focus on the safe, convenient, and enjoyable mobility of pedestrians, bicyclists, and people with disabilities who use assistive devices. These policies have much in common with Complete Streets policies, but focus more squarely on the needs and experience of pedestrians and non-motorized vehicles. Communities that have a bike walk policy or plan demonstrate that they place a high priority on planning methods and policies that favor alternative modes of travel. It also demonstrates a community's commitment to public health and quality of life, two major benefits of biking and walking.

Bike Pedestrian Plan: Yes/No?	No
<p><b>Some Policy Details:</b> Eagan does not have a Bike Pedestrian plan.</p> <p>However, it does outline an extensive trail system. This trail system is geared towards non-motorized transit, and includes local neighborhood trails, park and recreational trails, and transportation trails near major roadways.</p> <p>These trails are not identified as a 'Bike Pedestrian Plan,' but are incorporated in to the City's Transportation Trail System and accordingly are a part of Eagan's Comprehensive Guide Plan.</p> <p>Other guiding principles of Eagan's transportation plan include:</p> <ul style="list-style-type: none"> <li>• Supporting neighborhoods becoming more pedestrian-friendly through additional trail connections, sidewalks, improving street intersections, snow removal for walks and trails, and landscape treatments such as benches and shade trees.</li> <li>• Encouraging additional walking and bicycling in existing commercial areas by adding trail connections, breaking up parking areas into separate areas with identifiable walkways, adding bicycle storage, and enhancing streetscape through trees, benches, and pedestrian scale lighting.</li> <li>• Creating social gathering places to meet pedestrian needs.</li> <li>• Supporting developments that create the potential for places where people can live and work without an automobile.</li> <li>• Prioritizing investment in pedestrian facilities in districts where walkability and bikeability are already good by comparison to other areas of the community.</li> <li>• Designing and building City facilities to encourage walking and biking, including bike racks and/or lockers, showers and changing space, and sidewalks/talks located based on pedestrian movement rather than necessarily hugging roads.</li> </ul> <p>Eagan also commits to supporting education and safety programs for bicyclists and pedestrians, including safe routes to school, bike rodeos, trail maps and brochures, in order to promote safe use of the City's pedestrian and bicycle trails.</p> <p><b>Possible Next Steps to Develop a Policy:</b> Developing a distinct and more robust bike pedestrian plan could further highlight the important strides made towards prioritizing bicyclists and pedestrians in Eagan. Such a plan could also outline specific policies and standards to ensure that the guiding principles listed above are realized.</p>	

**For more information on Bike Pedestrian Plans:**

U.S. Department of Transportation, Bicycle and Pedestrian Transportation Planning Guidance

**Dakota County cities with Bike Pedestrian plans:**

- South St. Paul: <http://www.southstpaul.org/DocumentCenter/View/1039>
- Apple Valley: <http://www.ci.apple-valley.mn.us/DocumentCenter/Home/View/327>
- West St. Paul: <http://wspmn.gov/DocumentCenter/View/114>
- Rosemount: <http://ci.rosemount.mn.us/index.aspx?NID=452>

Source: Eagan Comprehensive Plan: [http://cityofeagan.com/images/CommunityDevelopment/Planning/CompPlan2030/7%20-%20Transportation\\_low.pdf](http://cityofeagan.com/images/CommunityDevelopment/Planning/CompPlan2030/7%20-%20Transportation_low.pdf)

Two critical issues that are often overlooked in bike walk policies and plans are safe intersection crossings and the infrastructure needs of persons with physical disabilities who use assistive devices. Safe crossings are critical for people of all ages, from parents pushing strollers, to older residents using walkers. The installation of audible and visual countdown timers at intersections is an effective feature for many users. **How is Eagan addressing the need for safe street crossings as a part of system connectivity? And are assistive devices well-supported by the current pedestrian infrastructure and maintenance program?**
