

Your child may have been exposed to:**CMV**

CMV (cytomegalovirus) is a common virus that infects most people, but rarely causes illness.

If you think your child has CMV, tell your childcare provider or call the school.

Children infected with CMV do not need to stay home from childcare or school.

For more information, call Dakota County Public Health Department at 952-891-7500.

Symptoms

Most people have no symptoms. Very rarely, a person may develop symptoms. These may include fever, sore throat, tiredness, and swollen glands.

Spread

- By having contact with saliva, urine, blood, or other bodily fluids of a person infected with CMV.

Contagious period

Virus may be in urine or saliva for long periods of time.

Call your health care provider

- If anyone in your home has symptoms of CMV.

Prevention

- Wash hands after using the toilet, changing diapers, touching secretions from the nose or mouth, before preparing food, and before eating. Your child may need help with handwashing.
- Clean and disinfect objects that come in contact with urine or saliva. Use a product that kills germs.
- Minimize contact with children's saliva. Avoid kissing their lips or hands.
- Do not have mouth contact with items contaminated with saliva.

For more information, call Dakota County Public Health Department at 952-891-7500.
