

CONSTRUCTION UPDATE

2020 Dakota County Overlay & Misc. Projects

May 19, 2020

Thank you for your patience while we make improvements to the surface of the roadway.

WHAT'S BEING DONE?

Dakota County will rehabilitate approximately 25 miles of pavement as part of the overlays contract this construction season. Pavement rehabilitation involves removing and replacing asphalt, typically referred to as a "mill and overlay," on the driving lanes and shoulders of the roadway. The end product will be a better looking, longer lasting and smoother roadway.

However, more than just pavement will be rehabilitated this season. Other work will include miscellaneous concrete work and minor utility adjustments and improvements. Improvements will be made to some of the signal systems. The west and east parking lots at the Northern Service Center, and the Camp Sacajawea entrance road at Lebanon Hills Regional Park will be resurfaced.

WHEN WILL WORK TAKE PLACE?

Work on County Road 9 (Dodd Boulevard) from Ideal Way to north of 194th Street in Lakeville is scheduled to begin the week of May 25 with minor utility adjustments and continue with the construction of a ¾ intersection at Dodd Boulevard and 194th Street.

Milling, paving, and striping the roadway is scheduled to occur the last of week of July.

WHAT SHOULD I EXPECT?

Work will include milling the existing pavement, paving, and minor utility adjustments. The road will remain open to local traffic and you will have access to your property throughout construction. However, delays are expected. For the safety of both the residents and the workers, please be patient.
