

Open House

Monday, June 25th

4:30 – 6:30 p.m.

Miesville Fire Station

14221 240th St E, Hastings, MN 55033

Why is the work needed?

County Road 91 is an old road with narrow shoulders that has reached the end of its life and is in need of upgrading. Ongoing maintenance issues, as a result of the surrounding surface drainage, are another major driving factor in initiating this project.

You're invited!

Dakota County will host a series of public open house meetings to facilitate area residences and businesses with an opportunity to contribute valuable information and feedback into the project's development. As a property owner or tenant in the area, we request your participation. Feedback into what the county is proposing, early in the design, is important to the end product.

At this first meeting, you will be invited to assist our design team in the calibration of a drainage model. By providing your first-hand accounts and observations, our design team will have a better understanding of the drainage problems along County Road 91.
