

Welcome

Lake Marion Greenway Project

PURPOSE OF POP UP:

1. Learn about the alignment we are proposing for this trail.
2. Talk with project staff.
3. Provide feedback on the alignment.

This is the best opportunity to give your input on the preferred alignment.

PROJECT OBJECTIVES:

The project will identify a preferred trail alignment, South Creek bridge crossings and a grade-separated crossing design of Cedar Avenue.

Other amenities will include:

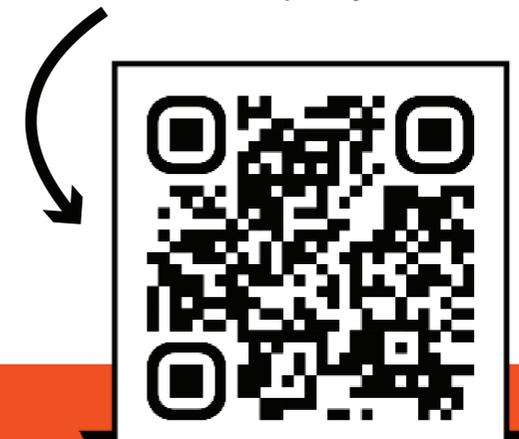

- Safety and accessibility improvements of the trail crossings at Hamburg Ave. and Holyoke Ave.
- Connections to local trails and sidewalks
- Benches
- Wayfinding and interpretive signage, landscaping

Preferred Alignment

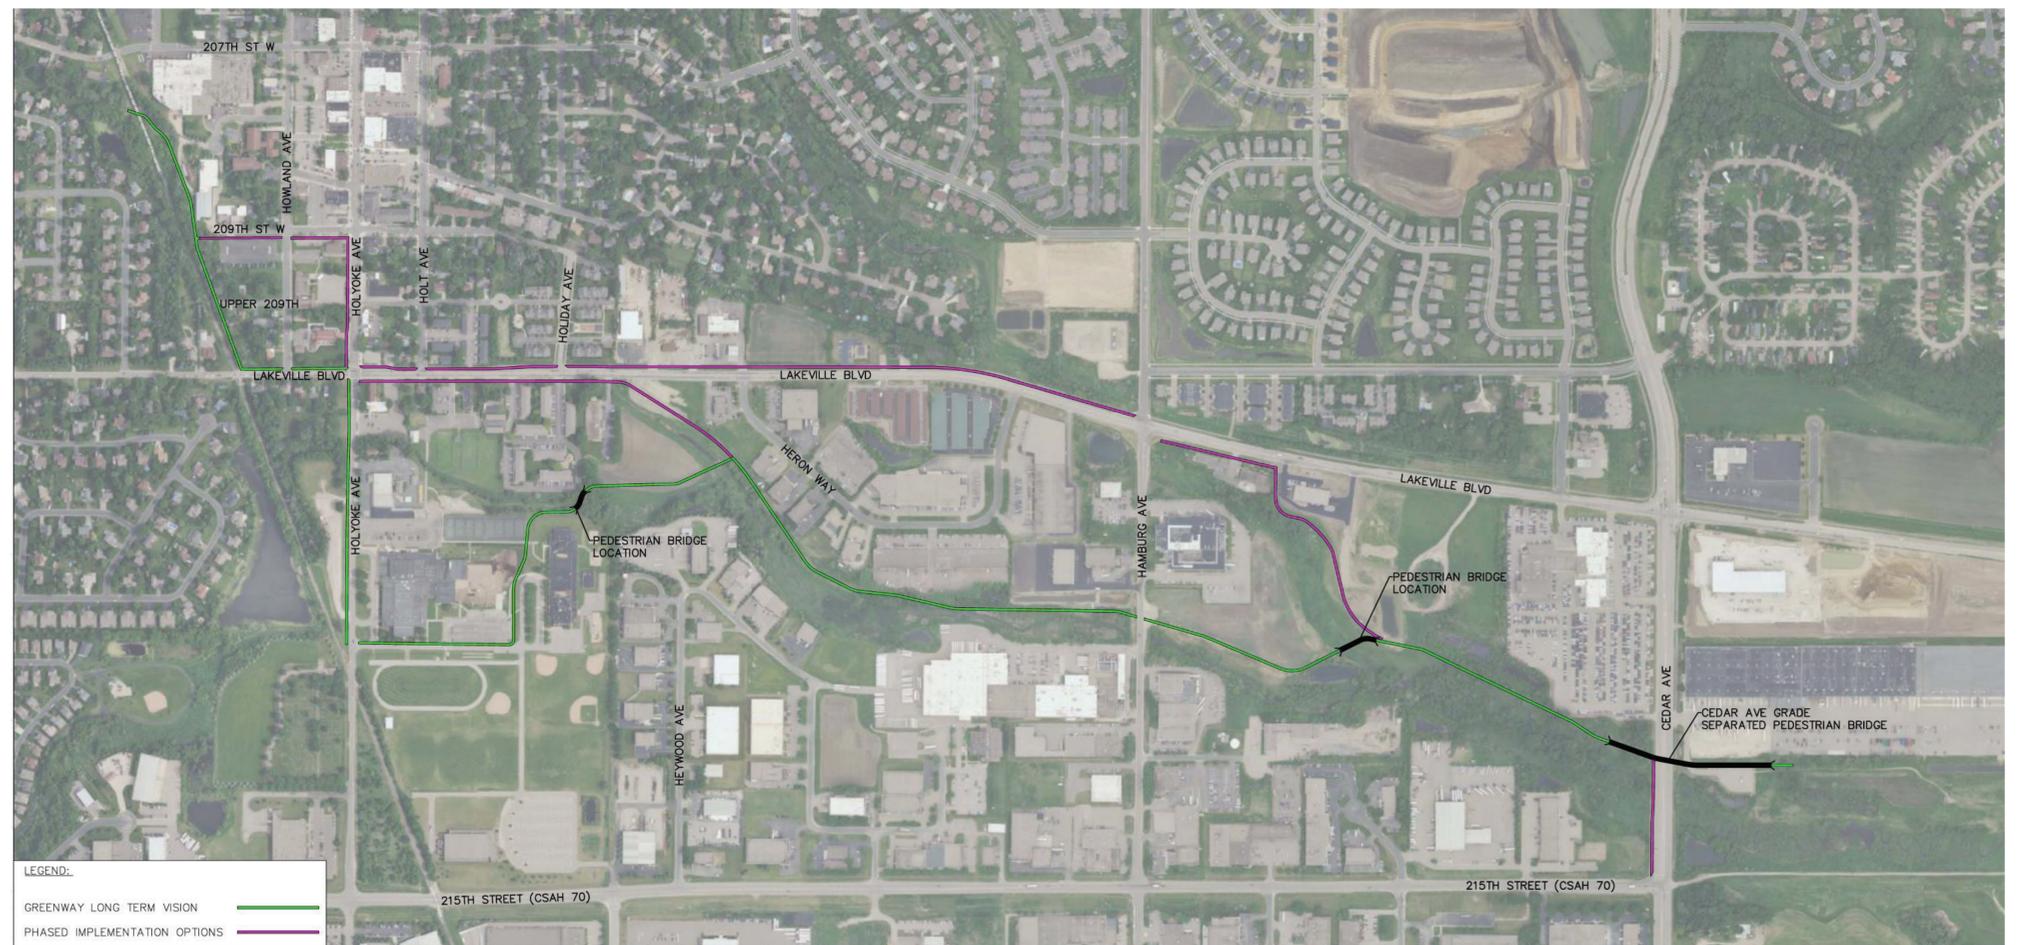

Lake Marion Greenway Project

KEY DETAILS:

The green line is the preferred alignment we are proposing for the long term vision for the trail. The alignment stays on the north side of the creek. This alignment is preferred because it:

- Provides future trail connectivity to Lakeville South Creek Trail
- Has minimal Flood Plain impacts

The purple line shows a phased implementation alignment. This provides an easy option to make quick connections if needed in the short term.
