

Study Overview

Pilot Knob Road Corridor Study

Study Goal

Identify a roadway improvement plan for the Pilot Knob Rd (CSAH 31) corridor between Yankee Doodle Rd and Central Parkway/Northwood Parkway to address existing traffic and safety concerns such as delays, lack of available gaps to cross traffic and crash history as well as additional issues and needs based on projected growth in the area.

Key Elements of Study

» Document need for future improvements, which may include:

1. Access Modifications
2. Local Street Connections
3. Median Installation and Additional Lanes or Turn Lanes
4. Intersection Control Changes

- » Identify alternative roadway improvement concepts
- » Select a preferred roadway improvement concept
- » Develop implementation plan

Next Steps and Study Schedule

- » Revise concepts as needed (September)
- » Recommend preferred concept (September)
- » Present recommendations and preferred concept to Eagan City council (October)
